

Application Checklist

The following documents are required and must be submitted via Smartsheet in one single PDF document, not to exceed 25 MB. The Signature Page may be submitted separately if there are issues combining with the single PDF document. Keep the file name brief, as files are corrupted when file names are too long. Refer to the Grant Application Guide for additional information and/or samples. Failure to include any of the required documents will result in a reduced application score.

PDF documents should be submitted in their fillable PDF formats. The original file formats will be required upon grant award.

Required Application Documents	
(✓)	Ensure these items are completed prior to submitting to Caltrans via Smartsheet
	Application Cover Sheet (complete in Smartsheet and submit with single PDF document)
	Signature Page (Electronic signatures accepted; may submit as a separate file if there are issues with combining with single PDF document)

Sustainable Transportation Planning Grant Program

GRANT APPLICATION COVER SHEET

PART B. PROJECT INFORMATION (CONTINUED)

Project Description (3-5 Sentences Max.)

Insert Application Narrative:

1. Project Description

The Rengstorff Avenue Complete Streets Study (Study) will consider ways to enhance safety, incorporate green street elements, and improve multimodal access for people walking, bicycling, using public transit, and driving the 1.7 mile corridor along and across Rengstorff Avenue between El Camino Real and Leghorn Street. The project is necessary because Rengstorff Avenue is on the City's high injury network and MTC's regional high injury network and was identified as the highest priority corridor in the City's Comprehensive Modal Plan ("AccessMV"), based on equity, mobility, walkability/bikeability, safety, sustainability, and consistency criteria. Major deliverables will include parking and traffic analysis, community and stakeholder engagement, preliminary concept development and feasibility analysis, and plan line drawings for a preferred concept.

Project Type

Choose the Project Type that best represents the focus of the proposed project. See Grant Application Guide for examples. Two max. may be selected.

- ☐ Active Transportation (Bicycle and Pedestrian)
- ☐ Climate Change (Infrastructure Adaptation, Vulnerability and Resiliency)
- ☒ Complete Streets (Multimodal specific type)
- ☐ Corridor (Local Streets or Highways)
- ☐ Freight/Goods Movement
- ☐ General Plan-Related (Circulation Element, Land Use Element, Specific Plan)
- ☐ Multimodal (Motorized and Active Transportation)
- ☒ Safety (Vision Zero, Safe Routes to Schools)
- ☐ Technical (Modeling, VMT Mitigation, ZEV Infrastructure, ZEB Transition, etc.)
- ☐ Transit (Bus, Light Rail, and Commuter Rail Service)
- ☐ Other, specify:

Underserved Community Definitions

If applicable to the project, what tools were used to identify the underserved communities in the project area? Choose all that apply.

- ☐ Rural Communities of 50,000 or less and outside of urbanized areas
- ☐ Native American Tribal Governments
- ☒ Regionally/Locally Defined Underserved Communities
- ☐ At/Below 80% Assembly Bill 1550 (Gomez, Statutes of 2016)
- ☐ At/Above 75% California Department of Education, Free or Reduced Priced Meals Data
- ☐ At/Above 75% CalEnviroScreen Version 4.0
- ☐ At/Below 25% California Healthy Places Index

Sustainable Transportation Planning Grant Program

GRANT APPLICATION COVER SHEET

PART C. CONTACT INFORMATION*

	Primary Applicant	Sub-Applicant	Sub-Applicant
Organization (Legal name)	City of Mountain View		
Dept./Division	Public Works Department		
Street Address	500 Castro Street		
City	Mountain View		
Zip Code	94041		
Phone Number	650-903-6311

Sustainable Transportation Planning Grant Program

GRANT APPLICATION COVER SHEET

PART D. COMPLIANT HOUSING ELEMENT

City/County Primary/Sub-Applicants for Sustainable Communities Grants	Yes	No
Does the City/County have a compliant Housing Element? If No, explain the current status:	Yes	
Has the City/County submitted Annual Progress Report to the California Department of Housing and Community Development for calendar years 2021 and 2022?	Yes	

PART E. OTHER FUNDING PROGRAMS

Applicants may leverage other program funds for this planning grant, as long as the activities are eligible.

	Yes	No	N/A
Is the applicant applying for the Governor's Office of Planning and Research (OPR) Climate Adaptation Planning Grant Program? Applicants should not submit the same project application to both funding programs. However, applicants may propose to leverage funds from one funding program to another. For instance, an applicant with a large project may propose to fund one component with Caltrans funds, and another with OPR funds. Applicants may also propose two entirely different projects to each funding program. If yes, identify the differences between each proposal, and briefly summarize the leverage opportunity if awarded both Caltrans and OPR funding:		No	
Is the applicant applying for any other funding programs to complete this project? If yes, list them here:		No

Sustainable Transportation Planning Grant Program
SUSTAINABLE COMMUNITIES - GRANT APPLICATION
NARRATIVE

PART H. APPLICATION NARRATIVE

FY 2024-25

Project Information

Organization (Legal name)	
Project Title	
Project Area Boundaries	
Project Timeframe (Start and End Dates)	

Do not alter application format and font size 10

Application Narrative

- 1. Project Description (10 points) - 3-5 sentences maximum; Do not exceed the space provided.**
Briefly summarize project in a clear and concise manner, including why the project is necessary, major deliverables, parties involved, and any connections to relevant local, regional, and/or State planning efforts.

Sustainable Transportation Planning Grant Program

SUSTAINABLE COMMUNITIES - GRANT APPLICATION

NARRATIVE

2A. Project Justification (15 points) - Do not exceed the space provided

- Describe the problems or deficiencies the project is attempting to address, as well as how the project will address the identified problems or deficiencies
- Describe the ramifications and impact of not funding this project
- Clearly define the existing issues surrounding the project (e.g., transportation issues, inadequate transit services, impacts of heavy trucking on local streets, air pollution, etc.)
- Competitive applications support the need for the project with empirical data
- Describe how this project addresses issues raised
- Define the public benefit
- Explain how the public was involved with identifying issues

Sustainable Transportation Planning Grant Program
SUSTAINABLE COMMUNITIES - GRANT APPLICATION
NARRATIVE

2A. Project Justification (continued)

Sustainable Transportation Planning Grant Program

SUSTAINABLE COMMUNITIES - GRANT APPLICATION

NARRATIVE

2B. Underserved Communities Justification (5 points) - Do not exceed the space provided

- Explain how the project area or portions of the project area are defined as an underserved community, including Native American Tribal Governments and rural communities
- Explain how the proposed project addresses the needs of the underserved community
- Describe how underserved communities will benefit from the proposed planning project
- Cite data sources, the Grant Application Guide Appendix A tools used to define underserved communities, and include a comparison to the statewide thresholds that are established in each tool

2C. Underserved Communities Engagement (5 points) - Do not exceed the space provided

- See Grant Application Guide, Appendix A, for community engagement best practices
- Describe how the proposed effort would engage underserved communities, including Native American Tribal Governments and rural communities. Include specific outreach methods for involving underserved communities
- Describe how underserved communities will continue to be engaged during the next phases after the proposed planning project is complete, including project implementation.

Sustainable Transportation Planning Grant Program

SUSTAINABLE COMMUNITIES - GRANT APPLICATION

NARRATIVE

3. Grant Specific Objectives (Total 35 points)

Integrate the following Grant Program Considerations (Grant Application Guide, Chapter 1.2) in the responses for 3A-G below, as applicable:

- Caltrans Strategic Plan
- California Transportation Plan (CTP)
- Modal Plans that Support the CTP
- Title VI and Environmental Justice
- Climate Action Plan for Transportation Infrastructure
- California Adaptation Strategy
- Master Plan for Aging

3A. Grant Specific Objectives (5 points) - Do not exceed the space provided

- Explain how the proposal encourages local and regional multimodal transportation, housing and land use planning that furthers the region's RTP SCS (where applicable)
- Demonstrate how the proposed effort would coordinate transportation, housing, and land use planning components of the project to inform one another (i.e., regular coordination meetings between responsible entities, joint community meetings, letters of commitment from all relevant implementing agencies, etc.
- Explain how the proposed effort would contribute to shifts in land use towards more sustainable and equitable communities, such as more affordable housing near transit or more compact regional development patterns (Reference Grant Application Guide, Chapter 2.2, for example project types)

Sustainable Transportation Planning Grant Program

SUSTAINABLE COMMUNITIES - GRANT APPLICATION

NARRATIVE

3B. Grant Specific Objectives (5 points) - Do not exceed the space provided

- Explain how the proposal contributes to the State's GHG reduction targets and advances transportation related GHG emission reduction project types/strategies (i.e., mode shift, demand management, travel cost, operational efficiency, accessibility, and coordination with future employment and residential land use, etc.)

3C. Grant Specific Objectives (5 points) - Do not exceed the space provided

- Explain how the proposal supports other State goals, including but not limited to:
 - State Planning Priorities (Government Code Section 65041.1)
 - Climate Adaptation Goals (State Adaptation Strategy)
 - Goals and Best Practices cited in the 2017 RTP Guidelines, Appendices K and L

Sustainable Transportation Planning Grant Program

SUSTAINABLE COMMUNITIES - GRANT APPLICATION

NARRATIVE

3D. Grant Specific Objectives (5 points) - Do not exceed the space provided

- Explain how the proposal encourages stakeholder involvement
- List the stakeholders involved in the planning effort (e.g., first responders, community-based organizations, local housing and public health departments, transit agencies, and partners including State, federal, local agencies)
- Explain how stakeholders will be involved throughout the project

3E. Grant Specific Objectives (5 points) - Do not exceed the space provided

- Explain how the proposal involves active community engagement
- Describe the specific public outreach methods/events that will be employed throughout the project
- Explain how public input will inform the project
- Describe how the effort will survey the public at the end of each outreach event to gauge effectiveness of these activities for the planning effort

Sustainable Transportation Planning Grant Program

SUSTAINABLE COMMUNITIES - GRANT APPLICATION

NARRATIVE

3F. Grant Specific Objectives (5 points) - Do not exceed the space provided

- Explain how the proposal assists in achieving the Caltrans Mission and Grant Program Objectives (Grant Application Guide, Chapter 1.2): Sustainability, Preservation, Accessibility, Safety, Innovation, Economy, Health, and Social Equity, as applicable

3G. Grant Specific Objectives (5 points) - Do not exceed the space provided

- Explain how the proposal ultimately results in funded and programmed multimodal transportation system improvements
- Discuss next steps for project implementation, including timing for programming improvements that would result from the planning effort

Sustainable Transportation Planning Grant Program

SUSTAINABLE COMMUNITIES - GRANT APPLICATION

NARRATIVE

4. Project Management (Total 30 points)
See Scope of Work and Cost and Schedule samples and checklists for requirements (Grant Application Guide, Appendix B), also available on the Caltrans grants website: https://dot.ca.gov/programs/transportation-planning/division-of-transportation-planning/regional-and-community-planning/sustainable-transportation-planning-grants
4A. Scope of Work (15 points)
4B. Cost and Schedule (15 points)

Scope of Work Checklist

The Scope of Work (SOW) is the official description of the work that is to be completed during the contract. Tasks 1-6 outlined in the SOW are for illustrative purposes only.

Applications with missing components will be at a competitive disadvantage. Please use this checklist to make sure your Scope of Work is complete.

Scope of Work Checklist	
(✓)	Ensure these items are completed prior to submitting to Caltrans
✓	Use the Fiscal Year 2024-25 template provided
✓	Include the activities discussed in the grant application
✓	List all tasks using the same title as stated in the Project Cost and Schedule
✓	Include task numbers in accurate and proper sequencing, consistent with the Cost and Schedule
✓	Exclude sub-task numbers; only include sub-headings
✓	Exclude tasks for project management and/or staff/consultant coordination; these activities should be spread among relevant tasks
✓	Include a thorough Introduction to describe relevant background, related planning efforts, the project and project area demographics, including a description of the underserved community involved with the project, if applicable
✓	Include a thorough and accurate narrative description of each task
✓	Task 01 is a required task. It must be titled "Project Administration", it cannot exceed 5% of the grant award amount, and only the grantee and sub-recipient(s) can charge against this Task. This Task must only include the following activities and deliverables: • Caltrans and grantee Project kick-off meeting at the start of the grant • Invoicing and quarterly reporting to Caltrans • DBE Reporting (federal grants only)
✓	Include Task 02 for the procurement of a consultant (if needed). This task is for the <u>grantee and sub-recipient(s) only</u> .
✓	Include detailed public participation and services to diverse communities in the Public Outreach Task (excluding technical projects)
✓	Identify public outreach strategies in a manner that provides flexibility and allows for a diverse range of outreach methods (both in-person and on-line), excluding technical projects
✓	Include a Task(s) for a Draft and Final product. The draft plan must include an opportunity for the public to provide feedback (excluding technical projects).
✓	Include a summary of next steps your agency will take towards implementing the project in the Final Product
✓	List achievable project deliverables for each Task
✓	EXCLUDE environmental, complex design, engineering work, and other ineligible activities outlined in the Grant Application Guide

SCOPE OF WORK

Project Information	
Grant Category	Sustainable Communities Competitive
Grant Fiscal Year	FY 2024/2025
Project Title	Rengstorff Avenue Complete Streets Study
Organization (Legal name)	City of Mountain View

Disclaimer

Agency commits to the Scope of Work below. Any changes will need to be approved by Caltrans prior to initiating any Scope of Work change or amendment.

Introduction

The Rengstorff Avenue Complete Streets Study (Study) will consider ways to enhance safety, incorporate green street elements, and improve multimodal access for people walking, bicycling, using public transit, and driving the 1.7-mile corridor along and across Rengstorff Avenue between El Camino Real and Leghorn Street.

Rengstorff Avenue is on the City's high injury network and was identified as the highest priority corridor in the City's Comprehensive Modal Plan ("AccessMV"), based on equity, mobility, walkability/bikeability, safety, sustainability, and consistency criteria.

The entire length of Rengstorff Avenue is a key school access route for Los Altos High School and Waldorf School. Additionally, the roadway is within the school catchment for six other schools. (See Attachment 1). The intersections of Rengstorff Avenue with Rock Street, Junction Avenue, Montecito Avenue, Stanford Avenue and Latham Street are along the City's suggested routes to school for Crittenden Middle, Monta Loma, Stevenson, Mistral and Castro Elementary, and Graham Middle schools. Rengstorff Avenue corridor also serves as a key route to Rengstorff Park, Heritage Park, Wyandotte Park, Mountain View Community Center and Mountain View Senior Center. The roadway is the City's key senior route between the Senior Center and the neighborhood with the highest proportion of senior housing.

As shown in Attachment 2, the project serves two locally recognized equity priority neighborhoods including a neighborhood with a high proportion of senior low-income households that is bordered by Rengstorff Avenue, Middlefield Road, Sierra Vista Avenue and Central Expressway; and a neighborhood with a high proportion of low-income and Spanish speaking families and households that is bordered by Rengstorff Avenue, Caltrain, Escuela Avenue and El Camino Real.

Major deliverables for the Study will include:

- parking and traffic analysis,
- community and stakeholder engagement,
- preliminary concept development and feasibility analysis, and
- plan line drawings for a preferred concept
- high-level cost estimate for the preferred alternative.

Parties involved in community and stakeholder engagement will include local community-based organizations, the City's Bicycle/Pedestrian Advisory Committee and Council Transportation Committee.

The Study is consistent with, and will connect to various local, regional and state planning efforts including California's Executive Order B-55-18, Senate Bill 32, Plan Bay Area 2050, the City of AccessMV, Vision Zero Policy, Vision Zero Action Plan, and Local Road and Safety Plan. It will also align with planned complete streets improvements associated with Rengstorff Avenue Grade Separation (which will incorporate Class IV protected bikeways, sidewalk widening, and intersection improvements), and intersection improvements at Rengstorff Avenue/Latham Street and Rengstorff Avenue/Junction Avenue.

Project Stakeholders

Key project stakeholders are listed in Task 4 and will be engaged as outlined in that task.

City will establish a technical advisory committee (TAC) of internal City team consisting of staff from various departments, including Public Works, Community Development, Community Services, and City Manager's office (sustainability group). City's project manager will schedule periodic meetings check-in meetings with the Caltrans representative to update on progress of the project.

Community engagement will be an on-going effort, with two to three rounds of engagement events scheduled at key project milestone points. Engagement events include community meetings, pop-up events and presentations at Bicycle/Pedestrian Advisory Committee (BPAC), Council Transportation Committee (CTC), school community and public meetings/open houses. These events will focus on presenting updates on the project and gathering feedback from community members and stakeholders.

The City will utilize consultant services to deliver the full scope of the project.

Overall Project Objectives

The Rengstorff Avenue Complete Streets Study (Study) is a critical project addressing existing safety concerns, enhancing equity, and improving overall community well-being. The Study will consider treatments that include the following:

- Crossing improvements;
- Other intersection improvements;
- Speed management strategies;
- Sidewalk extensions and improvements;
- Bicycle facility upgrades;
- Green street elements; and
- Opportunities for driveway access management.

Summary of Project Tasks

Task 01: Project Administration

Upon grant authorization, the City will hold a kick off meeting with key project stakeholders including Caltrans. The City's project manager will conduct periodic check in meetings with the

Caltrans representative to provide project status updates and will process quarterly invoices and provide progress reports.

Task Deliverables
Kick-off meeting with Caltrans – Meeting notes, quarterly invoices and progress reports

Task 02: Consultant Procurement

The City will procure a consultant, consistent with City and grant requirements, Local Assistance Procedures Manual for procuring non-Architectural and Engineering consultants, the Grant Application Guide, Regional Planning Handbook, and the executed grant contract between Caltrans and the City.

Task Deliverables
- City's current procurement procedures - Copy of the Request for Proposal/Qualifications - Copy of the contract between consultant and grantee - Copies of all amendments to the consultant contract - Meeting notes from project kick-off with consultant

Task 1: Kick-off and Project Management

The project team will conduct a project kickoff meeting and regular check-in meetings with the Consultant. The Consultant will provide documentation and notes of calls and meetings. Key stakeholders will be included in project planning and coordination as needed. Reports and deliverables will be reviewed and approved by the City before they can be deemed complete.

Task Deliverables
Monthly progress reports and invoices

Task 2: Existing Conditions and Background Review

The project team will review background materials including local and regional plans, past studies, transportation plans, and approved/planned development projects. This information is essential to develop the framework for subsequent tasks within this scope of the work.

The project team will also compile or collect key data pertinent to developing and analyzing alternatives including:

- As-built drawings of public rights-of-way (ROWs) in the study area;
- Curb-to-curb, ROW-to-ROW, and lane widths;
- Multi-modal traffic counts at key locations and/or intersections;
- Parking inventory and utilization data, which may be supplemented by City staff;

- Speed survey data;
- Traffic collision data; and
- Demographic and land use data, include underserved communities

Task Deliverables
Draft & Final Existing Conditions Memo

Task 3: Alternatives Development and Analysis

The project team will develop schematics for up to three concept alternatives. This task may include a tiered approach to identify a range of alternatives and evaluate those alternatives based on preliminary information. The team will then conduct a fatal-flaw analysis to remove alternatives that do not meet the purpose and need of the project. Alternatives for the corridor could include:

- Crossing improvements including bulbouts, high-visibility crosswalks, median crossing islands, RRFBs, and Pedestrian Hybrid Beacons;
- Other intersection improvements including lighting, pedestrian refuges, reduced turn radii, and protected left-turn phases;
- Speed management strategies including road diets, lane narrowing, center medians and opportunities for reduced posted speed limits;
- Sidewalk extensions and improvements including bulbouts and bus stop treatments;
- Bicycle facility upgrades including Class IV bikeway facilities and protected intersections;
- Green street elements including sustainable stormwater infrastructure, street trees, and native pollinator landscaping; and
- Opportunities for driveway access management.

The feasibility, pros, and cons of each alternative are assessed in relation to the following criteria. These criteria will be updated (as needed) based on the feedback from the technical advisory committee and community feedback.

- Pedestrian safety, convenience, and comfort;
- Bicycle safety, convenience, and level of traffic stress;
- On-street parking demand and availability;
- Motor vehicle speed and volume;
- Transit access and on-time reliability;
- Right-of-way and utility impacts;
- Access impacts (deliveries, garbage)
- Biodiversity, stormwater and compatibility with environmental and social context; and
- Community support
- Estimated capital and ongoing cost.

Alternatives comparison will be vetted through the technical advisory group.

Task Deliverables
- Schematic layouts for initial screening/fatal-flaw analysis - Screening criteria memorandum - Summary of Alternatives Analysis

Task 4: Outreach & Community Engagement

The project places a robust emphasis on stakeholder involvement and a collaborative approach to sustainable transportation through several key strategies:

- Technical Advisory Committee - includes internal City stakeholders from various divisions including Police Traffic Enforcement, Fire Emergency Response, Traffic Engineering, Civil Infrastructure and Sustainability.
- Multi-Lingual and Targeted Outreach: Community engagement opportunities for the Study will be publicized using multilingual materials such as postcards, yard signs and posters. Postcards will be sent to tenants, owners, and businesses within the study area, while posters will be posted in locations frequented by underrepresented residents such as laundromats, schools, poles in low-income neighborhoods and affordable or transitional housing developments.

Outreach materials will also include email blasts sent to key stakeholders such as transit agency contacts (VTA and MTMA), Community Based Organizations (such as Mountain View Dayworker Center and El Cafecito), Spanish and Chinese Leadership Academy members, school administrators and Safe Routes to School contacts, and other transportation and environmental advocacy organizations. Further outreach will be undertaken by the City's Multicultural Engagement Coordinator who maintains a mailing list of non-English speaking community stakeholders.

- Community Engagement Processes: The Study incorporates extensive community engagement processes, including public meetings, surveys, and pop-up engagement events at community gathering places such as the Senior Center, Community Center and Rengstorff Park.
- Virtual Engagement Events, Surveys and Online Platforms. Recognizing the diverse needs and preferences of stakeholders, the Study will utilize virtual engagement events to accommodate a wider range of participants and ensure inclusivity and accessibility for working families and others who may face physical or time constraints.
- Committee and Council Presentations: Presentations to the Bicycle/Pedestrian Advisory Committees, Council Transportation Committee and/or City Council will serve to keep key decision-makers informed and engaged.
- Feedback Incorporation. The Study demonstrates a commitment to incorporating feedback received from stakeholders. For example, survey respondents for the City's Active Transportation Plan noted the lack of continuity and poor condition of sidewalks along Rengstorff Avenue—which will be addressed in this Study.

Specific outreach methods to involve underserved communities in the area include the following:

- Translation of outreach materials such as postcards, yard signs, posters and surveys into Spanish and Chinese, with support from the City's Multicultural Engagement Team;
- Distribution of multi-lingual outreach material to the City's mailing list of Community Based Organizations, multicultural contacts including graduates of the City's Spanish Leadership Academy and Chinese Leadership Academy;
- Posting of additional outreach materials in underserved communities including posters on telegraph poles, laundromats and school offices;

- Translation and interpreting services for engagement events;
- Multilingual pop-up events that may be held at Rengstorff Park, Mountain View Senior Center and/or the Mountain View Community Center on Rengstorff Avenue.

Task Deliverables
Outreach plan; PowerPoint Presentations, flyers, website announcements, sign-in sheets, community surveys, conceptual drawings, bilingual services

Task 5: Refinement and Selection of Preferred Alternative

The project team will use screening criteria developed under Task 3 refine alternatives. This information, along with community and stakeholder feedback, will also inform selection of the preferred alternative.

After the preferred alternative has been identified, preliminary (10%) engineering drawings will be developed for the preferred alternative along with high-level cost estimate, including right-of-way cost (if any).

Task Deliverables
Preferred alternative selection memo; 10% level engineering drawing and high-level cost estimate for preferred alternative

Task 6: Draft and Final Plan

Following the alternatives analysis and community engagement process, project draft report will be prepared as an accessible and easy to read document. The draft plan will include:

- Executive Summary
- Existing Conditions Analysis
- Alternatives Development and Analysis
- Outreach and Community Engagement Summary
- Selection of Preferred Alternative
- Next Steps, including implementation strategies and future grant opportunities

The final plan (and associated technical studies) will include next steps that will detail the implementation strategies and identify future grant opportunities for next phases of the project.

Task Deliverables
Draft Plan, Public Review – list of comments, Final Plan for Committee/Council Review and approval.

Task 7: Committee/Council Review

The project team will present the draft plan developed under Task 6 to the Committees/Council for review and public input. Feedback will be incorporated into the final plan that will be included for Committee/Council recommendation/approval. These meetings will be publicly noticed following the City's process.

Task Deliverables
Council/Committee memo preparation, presentation materials, meeting minutes with Committee/Council recommendation/approval..

Attachment 1

RENGSTORFF AVENUE COMPLETE STREETS STUDY:
PROJECT MAP

Underserved Communities

The Rengstorff Avenue corridor is adjacent to two locally recognized low-income communities.

- The first community is the neighborhood south of Caltrain (between Caltrain and El Camino Real to the east and west of Rengstorff Avenue). Based on the US Census, this area has the highest density of low-income households and a high proportion of Spanish and Mandarin speaking families and households without access to a car (Figure 1). The neighborhood features many low-income, naturally affordable, multi-family apartments subject to rent stabilization, as well as new affordable housing developments (subsidized rentals) (Figure 2).
- The second community is the neighborhood north of Central Expressway (bordered by Rengstorff Avenue, Middlefield Road, Sierra Vista and Central Expressway). The US Census identifies this block group as having the highest concentration of seniors in the City. The neighborhood features many smaller naturally affordable housing developments with stabilized rent, as well as new affordable housing (subsidized rental). (Figure 2)

These two neighborhoods were locally defined as underserved as part of the City's Shuttle Study and City's Comprehensive Modal Plan (AccessMV) plan. This local analysis measured transit propensity—a metric based on equity variables such as the proportion of low-income, non-English speaking and zero-vehicle households as well as the proportion of households with children.

Analysis for the City's Vision Zero Action Plan / Local Road Safety Plan (VZAP/LRSP) found that Spanish-speaking residents are over-represented in traffic crashes involving all modes of transportation in the city. CalEnviroScreen shows minorities (Asian American and Hispanic) constitute approximately 57% of the total population in the project vicinity and elderly residents constitute 9-20% of the population. Environmental factors (Diesel Particulate Matter, Traffic), demographic distribution (Linguistic Isolation, Minorities and Seniors), and health indicators (Low Birth Weight) across these tracts suggest the need for addressing senior-focused facilities, language barriers, and the needs of low-income residents.

Beyond these two neighborhoods, the City of Mountain View is committed to increasing housing availability and affordability throughout the City through Rent Stabilization, Subsidized Rental Housing, Below Market Rate Housing Development, and Transitional Housing. In total, Mountain View currently has 14,000 affordable housing units because of these programs with more affordable housing in the works. As shown in Figure 3, these programs mean that low-income households and affordable housing are distributed across the City and interspersed with higher income households and neighborhoods. This strategy results in less concentration of poverty in a particular district of the City, which means that no single Census tract meets the definitions of MTC's Equity Priority Communities. Nevertheless, the corridor area meets the definition of a locally defined underserved community. Within the study area but beyond the two locally recognized low-income neighborhoods, additional affordable housing includes the City's LifeMoves housing on Leghorn Street and subsidized housing north of Old Middlefield Way.

Prioritization of Key Segments and Intersections

The information extracted from VZ/LRSP analysis below shows that Rengstorff Avenue is top key priority corridor and one intersection along Rengstorff Avenue with the grant project area was identified as key priority intersection.

(Source: Page 14 of the February 22, 2023 BPAC memo)

Based on the ongoing projects below are the top-scored corridors and intersections where there are no scheduled improvements planned:

1. Prioritized Key Segments:

- a. Rengstorff Avenue, El Camino Real to U.S. 101.
- b. Shoreline Boulevard from El Camino Real to Montecito Avenue
- c. San Antonio Road (City of Mountain View)
- d. Villa Street from Shoreline Boulevard to Calderon Avenue
- e. Old Middlefield Way
- f. North Whisman Road
- g. Miramonte Avenue (Castro Street to El Camino Real and Cuesta Drive to City border)
- h. Sierra Avenue
- i. Cuesta Drive
- j. East Dana Street
- k. West Dana Street

2. Prioritized Key Intersections:

- a. Independence Avenue and Middlefield Road
- b. Ortega Avenue and Latham Street
- c. San Antonio Road and Fayette Drive
- d. California Street and Pacchetti Way
- e. Whisman Road and Middlefield Road
- f. Flynn Avenue and Whisman Road
- g. Shoreline Boulevard and Amphitheatre Parkway
- h. Sierra Vista Avenue and Hackett Avenue
- i. Mountain Shadows Drive and Shoreline Boulevard
- j. Rengstorff Avenue and San Ramon Avenue
- k. Charleston Road and Independence Avenue
- l. Bryant Avenue and Shady Spring Lane
- m. Madison Drive and Van Buren Circle

RE: City of Mountain View's Sustainable Communities Grant Application

Dear Ms. Cameron:

VTA supports the City of Mountain View's Sustainable Communities Grant Application. The City's grant proposal for the Rengstorff Avenue Complete Streets Study implements recommendations in VTA's Countywide Bicycle Plan and Pedestrian Access to Transit Plan and supports VTA's Complete Streets Policy. The Countywide Bicycle Plan identifies Rengstorff Avenue as a Cross-County Bicycle Corridor, meriting higher than typical bicycle infrastructure. The Pedestrian Access to Transit Plan identifies the need for pedestrian crossing improvements along the Rengstorff Avenue Corridor.

Rengstorff Avenue connects residential areas, multiple recreational facilities, nearby elementary and middle schools, and a senior center. Multiple bus lines run along this important multimodal corridor. It is identified in the High Injury Networks for the City and the Metropolitan Transportation Commission.

We have worked with the City of Mountain View on several similar efforts, including the El Camino Real Streetscape Plan. We look forward to the City of Mountain View's continued collaboration with VTA staff on the Rengstorff Avenue Complete Streets Study, and we stand ready to collaborate with the City on the study if its grant application is successful.

Sincerely,

DocuSigned by:

To whom it may concern:

We're writing today in strong support of the city of Mountain View's grant application for the Rengstorff Avenue Complete Streets project. Our organization, Mountain View Streets for All, was founded 11 years ago after 3 pedestrian fatalities along a street adjacent to Rengstorff. Our original name was Great Streets Rengstorff Park because we supported safety changes in and around this community in order to create equitable streets for pedestrians, cyclists, and transit users. The density of housing in this neighborhood rivals that of some San Francisco neighborhoods. It also is one of the most socio-economically diverse neighborhoods in Santa Clara County where some of our neighbors do not have a car. Despite all this and good walkability in other parts of our city, the Rengstorff Avenue corridor remains a high-stress environment with a high rate of accidents and injuries. We believe that good design and traffic calming can improve the quality of life for all residents as well as save lives.

Rengstorff Avenue is a vital piece of Mountain View's Vision Zero and Safe Routes to School plans. It's along Safe Routes to Schools and multiple bus routes, near Mountain View's Senior Center, and it borders the city's largest park as well as a swimming pool.

We urge you to fund this beneficial project.

Sincerely,

Mountain View Streets for All

Dear City of Mountain View Transportation and Caltrans teams:

On behalf of local community groups Mountain View Coalition for Sustainable Planning, Silicon Valley Bicycle Coalition Mountain View, and Green Spaces Mountain View, I would like to voice our support for the grant funding being sought for the Rengstorff Avenue Complete Streets Study by the City of Mountain View through the Caltrans Sustainable Transportation Planning Grant (under the Sustainable Communities Competitive program). This support is in line with goals held by these groups to enhance our Complete Streets, active transportation, and safe routes to school related infrastructure, and this funding will help the City and community achieve this goal, in particular, in this case, in the Rengstorff Avenue area between El Camino Real and Leghorn Street.

We thank you in advance for your consideration on this.

Best regards,
Bruce England for Mountain View Coalition for Sustainable Planning, Silicon Valley Bicycle Coalition Mountain View, and Green Spaces Mountain View

To whom it may concern,

Rengstorff Avenue in Mountain View, California is designated as a so-called Safe Route to School but is anything but that. Children must navigate the non-existent bike lane or decaying sidewalks to reach their schools.

I am a member of a parents' group at Los Altos High School. We have been trying to encourage our students to bike to school. One of our biggest obstacles in this effort is the lack of safe bicycle and pedestrian infrastructure. Over half of our 2,000+ students come from the city of Mountain View and Rengstorff Avenue is one of the main feeder streets.

Please help us work with developers and city staff to improve this important corridor so we can, in good conscience, convince our students to bike or walk to school. If we can get students to use active transportation instead of driving, we will reduce pollution and traffic congestion for the next generation.

Thank you for your help.

Subject: Lets not let what happened in Oakland happen here - FIX the Rengstorff Corridor
Date: Thursday, January 18, 2024 10:15:56 AM

CAUTION: EXTERNAL EMAIL - Ensure you trust this email before clicking on any links or attachments.

Hi Aruna, City of Mountain View Board and Public Works department,
I am writing in to support the improvements for the Rengstorff Avenue Bike and Pedestrian Safety Route in Mountain View.

As I'm sure you are aware, there are loads of issues with this corridor in terms of providing pedestrians and cyclists with a safe route. There are tree roots that can cause trips and bikes to crash, sidewalks that are very decayed and cars that often are driving in and merging dangerously in the bike lanes. This corridor prevents many students from commuting to school on bicycle or walking due to its lack of safety. As we try to encourage more and more students to use environmental methods to get to school, we need to ensure we provide them with the safe routes to do so. And this is a very necessary pathway for them, but it is far too unsafe for these students.

I ask that you please dedicate funds to improving this area ASAP and not delay so that our students can have a safe passage to their school.

So, while my number one concern is the students safety and health, I'm also concerned that if we don't do anything about this ASAP there will be greater consequences that would actually do incremental harm to the City of Mountain View budget and insurance. Should there be an accident resulting in the death or severe compromising of someone due to these unsafe routes, there will likely be ensuing lawsuits. No money can ever replace the death or disablement of someone, but I'm sure you have heard about the Oakland lawsuits due to unsafe routes that cost the City dearly (and of course, disabled those who were affected).

Please press upon the City the importance of addressing this issue.

Best regards,
Amy Sabik

Subject: Improving Rengstorff Ave.
Date: Sunday, January 14, 2024 5:34:29 PM

CAUTION: EXTERNAL EMAIL - Ensure you trust this email before clicking on any links or attachments.

Hello Brandon and Aruna,

I strongly support the improvement of the Rengstorff Ave. route for people who walk, bike or take public transit.

It has been a high-priority for improvement in Mountain View since at least 2015. A large portion of the high school students living in Mountain View, who attend Los Altos High school, use Rengstorff Avenue to get to school every day. The road is quite treacherous from Central Expressway to El Camino Real, with shrinking and disappearing by lanes, cars and trucks merging and turning, narrow lanes, rough and uneven road surfaces that cyclists must travel over in close proximity to fast moving motor vehicles and other problems.

My son and many other students take this road every day on their bicycles or walking, just as my daughter used to do. I ride this route when I go to functions at the school as well as when traveling to stores or any other place south of Central Expressway and west of Shoreline Blvd. The road clearly prioritizes motor vehicle traffic.

There are things that can be done immediately to correct some of the hazards and make this a less treacherous route. Having the road reimagined and rebuilt as a complete street is also a wonderful idea. We should find the strength and imagination to do both. To the extent that the Sustainable Transportation Grant will allow us to fix Rengstorff Ave. to be safer right away, more beautiful, pleasant and even safer in the future, I am enthusiastically supportive!
